The accompanying notes are an integral part of these financial statements

1. Nature of operations

Romios Gold Resources Inc. (“Romios” or "the Company") has interests in resource properties and is in the process of determining whether its properties contain resources that are economically recoverable.

The accompanying unaudited interim consolidated financial statements of the Company have been prepared by, and are the responsibility of, the Company’s management. The Company’s independent auditor has not performed a review of these consolidated interim financial statements.

These interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at September 30, 2010 the Company had no sources of operating cash flows. The Company will therefore require additional funding which, if not raised, would result in the curtailment of activities and project delays. The Company had working capital of $972,814 as at September 30, 2010, and has incurred losses since inception, resulting in an accumulated deficit of $7,089,467 as at September 30, 2010. The Company’s ability to continue as a going concern is uncertain and is dependent upon its ability to continue to raise adequate financing. There can be no assurances that the Company will be successful in this regard, and therefore, there is doubt regarding the Company’s ability to continue as a going concern, and accordingly, the use of accounting principles applicable to a going concern. These interim consolidated financial statements do not reflect adjustments that would be necessary if the “going concern” assumption were not appropriate. If the “going concern” assumption were not appropriate for these interim consolidated financial statements, then adjustments to the carrying values of the assets and liabilities, the expenses and the balance sheet classifications, which could be material, would be necessary.

The recoverability of expenditures on its resource properties and related deferred exploration expenditures is dependent upon the existence of resources that are economically recoverable, confirmation of the Company's ownership interests in the claims, the ability of the Company to obtain necessary financing to complete the exploration and the development of the properties, and upon future profitable production or proceeds from disposition thereof.

2. Summary of significant accounting policies

These unaudited interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles (“GAAP”) with respect to preparation of interim financial statements on a basis consistent with the Company’s audited annual financial statements as at and for the year ended June 30, 2010 and should be read in conjunction with those statements as they do not contain all information or disclosure to be in accordance with Canadian generally accepted accounting principles for annual financial reporting. In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. Operating results for the three months ended September 30, 2010 may not be indicative of the results that may be expected for the year ending June 30, 2011.

Use of estimates and assumptions

The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

Future changes in accounting policy

Business combinations
In January 2009, the CICA issued Section 1582, Business Combinations, replacing Section 1581 of the same name. The new section will apply prospectively to business combinations for which the acquisition date is on or after January 1, 2011. Section 1582, which provides the Canadian equivalent to International Financial Reporting Standard 3, Business Combinations, establishes standards for the accounting for a business combination. Section 1582 requires business acquisitions (including non-controlling interests and contingent consideration) to be measured at fair value on the acquisition date, generally requires acquisition-related costs to be expensed, requires gains from bargain purchases to be recorded in net earnings, and expands the definition of a business. As Section 1582 will apply only to future business combinations, it will not have a significant effect on the Company's consolidated financial statements prior to such acquisitions.

Consolidated financial statements and non-controlling Interests
In January 2009, the CICA issued Sections 1601 "Consolidated Financial Statements", and 1602, "Non-controlling Interests", which replaces existing guidance. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1602 provides guidance on accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. These standards are effective on or after the beginning of the first annual reporting period beginning on or after January 2011 with earlier application permitted.

Impairment

Mineral properties are reviewed on a quarterly basis and when changes in circumstances suggest their carrying value may become impaired. Management considers mineral properties to be impaired if the carrying value exceeds the estimated undiscounted future projected cash flows from the use of the property and its related assets and their eventual disposition. If impairment is deemed to exist, the property and its related assets will be written down to fair value. Fair value is generally determined using a discounted cash flow analysis. Management determined that there was no impairment of carrying value on its British Columbia or Quebec properties.

3. Cash and cash equivalents

Cash and cash equivalents and cash and cash equivalents held for future exploration consists of cash and investments in Canadian Chartered Bank demand money market funds.

On July 5, 2010, the Company completed a private placement of 5,066,667 flow-through shares for gross proceeds of $760,000, on July 15 the Company completed a private placement of 2,250,000 flow-through shares for gross proceeds of $337,500 and on August 31, 2010 the Company completed a private placement of 2,000,000 flow-through shares for gross proceeds of $300,000.These funds were committed to be expended on Canadian Exploration Expenditures ("CEE") and are therefore not available for current working capital purposes. During the three months to September 30, 2010, the Company spent a total of $1,851,838 on exploration activities, including committed funds raised in the prior fiscal year, leaving a balance of $393,519 at September 30, 2010 to be spent on CEE.

British Columbia

On March 1, 2005, the Company acquired, through an exchange of shares, a 100% interest in McLymont Mines Inc. ("MMI"), a company whose only significant asset is an interest in the Newmont Lake Property in British Columbia.

In 2006, the Company entered into an option agreement with Galore Creek Staking Syndicate, 2003 to acquire a 100% interest in 5 land tenures (2,693 hectares) located in the Liard Mining Division of British Columbia, known as the Trek Property. The agreement calls for payments of $115,000 cash and the issuance of 500,000 common shares. These obligations have been fulfilled by the Company.

During the year ended June 30, 2008, the Company completed its obligations under an option agreement with Gulf International Minerals Inc. (“Gulf”) to earn a 50% interest in the Newmont Lake property in British Columbia, which consists of 18 mineral claims (6,175 hectares) in the Liard Mining Division of British Columbia. The Company also exercised its option to acquire an additional 25% interest in the property by issuing 2,777,778 common shares at a deemed value of $0.36 per share.

Under an amendment dated May 12, 2010, the Company has an option until December 31, 2011 to acquire the remaining 25% interest, subject to a 1.5% net smelter return royalty, for payment of $2,000,000 in cash and/or shares. If the Company elects not to exercise the option, a 75/25 joint venture will be formed with Gulf. The Company also has the option to purchase 0.5% of the net smelter return royalty for $1,000,000.

During the year ended June 30, 2008, the Company completed its obligations under an option agreement with Roca Mines Inc. ("Roca") to earn a 50% interest in 8 mineral properties (4,000 hectares) in the Liard Mining Division of British Columbia. On August 14, 2008 the Company entered into a joint venture with Roca for the further exploration and development on the property.

During the year ended June 30, 2006, the Company entered into an option agreement with Galore Creek Staking Syndicate, 2003 ("**Galore Creek**") to acquire a 100% interest, subject to a 2% net smelter returns royalty, in 2 land tenures (1,321 hectares) located in the Liard Mining Division of British Columbia, known as the RP Property. The agreement was amended February 24, 2010 and now requires a payment of $115,000 cash ($15,000 paid to date with the remaining $100,000 due December, 2013). In addition, the Company must issue a total of 800,000 common shares of which 350,000 have been issued and the remaining 450,000 are to be issued as follows: 50,000 shares on each December 1, 2010, 2011 and 2012 with the remaining 300,000 common shares to be issued December 1, 2013. The revised expenditure commitments now include optional expenditure commitments on the property totaling $900,000, with $100,000 to be spent before December 1, 2011; an additional $300,000 before December 1, 2012; and an additional $500,000 before December 1, 2013. The amendment agreement also requires the expansion of the size of the property to a minimum of 248 contiguous cells from the current 75 cells prior to December 1, 2010. The Company retains the option to fulfill these obligations.

In 2006, the Company entered into an option agreement with Galore Creek to acquire a 100% interest, subject to a 2% net smelter returns royalty, in 1 land tenure (614 hectares) located in the Liard Mining Division of British Columbia, known as the JW Property. The agreement was amended on February 24, 2010 and requires the payment of $115,000 cash, of which $15,000 has been paid with the remaining $100,000 due November 21, 2013, the issue of 700,000 common shares of which 250,000 common shares have been issued and certain expenditure requirements. The remaining 450,000 common shares are to be issued with the revised share issuance schedule as follows: 50,000 shares on each of December 1, 2010, 2011 and 2012; with the remaining 300,000 common shares to be issued December 1, 2013. The expenditure commitments have been replaced with optional expenditure commitments on the property totaling $1,400,000; with $100,000 to be spent before December 1, 2011; an additional $250,000 to be spent before December 1, 2012; an additional $450,000 before December 1, 2013; and an additional $600,000 before December 1, 2014. The amendment agreement also requires the expansion of the size of the property to a minimum of 220 contiguous cells from the current 35 cells prior to December 1, 2010. The Company retains the option to fulfill these obligations.

The Company also holds a 100% interest in 134 mineral properties in the Liard Mining Division of British Columbia.

Quebec

During the year ended June 30, 2009 the Company concluded an option agreement to acquire a molybdenum property that was the site of the former producing La Corne molybdenum mine approximately 30 kilometers from the town of Val d'Or, Quebec. The agreement provides for an initial payment schedule of $20,000 cash, completion of a minimum of $50,000 in exploration expenditures and the issuance of 650,000 shares of the Company over the three year period. To September 30, 2010, the Company has issued 260,000 common shares as per the agreement. The agreement is subject to a 3% Net Smelter Return (NSR) retained by the vendors, of which half (1.5%) can be repurchased for $500,000. The amount expended to September 30, 2010 is $988,137.

Ontario and Nevada

At June 30, 2009, the Company wrote down the carrying value of its Ontario and Nevada properties to a nominal amount as the Company's focus is currently on its BC and Quebec properties.

On July 15, 2010, the Company announced that it completed an additional private placement of 2,250,000 flow-through units priced at $0.15 per unit for gross proceeds of $337,500. Each flow-through unit consists of one common share and one-half of a common share purchase warrant with each full warrant entitling the holder to acquire a further share at a price of $0.25 per share until the earlier of 12 months from closing and the Trigger Date. A cash fee of $21,780 and 200,000 compensation options to acquire units at a price of $0.15 per unit were issued. Each compensation unit is comprised of one common share and one-half of one non-transferable share purchase warrant. Each full warrant entitles the holder to purchase one common share of the Company at a price of $0.25 per warrant share until the earlier of July 8, 2011 and the Trigger Date.

On August 31, 2010, the Company completed a private placement of 2,000,000 flow-through units priced at $0.15 per unit for gross proceeds of $300,000. Each flow-through unit consists of one flow-through common share and one-half of a common share purchase warrant with each full warrant entitling the holder to acquire a further share at a price of $0.25 per share until the earlier of 12 months from closing and the Trigger Date.

(b) Common share purchase options

The Company has created a stock option plan for the benefit of directors, officers, key employees, and consultants. The total number of shares which may be reserved and set aside for issuance to eligible persons may not exceed 10% of the issued and outstanding common shares. As at September 30, 2010, 8,675,000 common shares were reserved for the exercise of stock options granted under the Company's stock option plan (the "Plan").

The following table provides the details of changes in the number of issued common share purchase options during the period:

	Options #	**Weighted-average exercise price** $

8,675,000	8,287,500			

The weighted average fair value of all the options granted and outstanding is $0.29 per option, each contract fair value having been estimated at the date of grant using the Black-Scholes pricing model with the following assumptions: risk-free weighted-average interest rate ranging from 3.45% to 4.75%, expected dividend yield of nil, average expected volatility ranging from 66.48% to 105.5% and expected life term ranging from 24 to 60 months. Under this method of calculation, the Company has recorded $19,757 as stock based compensation during the period, being the fair value of the options vested during the three months ended September 30, 2010 ($9,779 during the three months ended September 30, 2009). Options that have been issued and remain outstanding vest either: immediately on date of grant; or a period of up to eighteen months from the date of grant over the period of vesting in equal installments.

(c) Warrants

On certain issuances of common shares, the Company grants warrants entitling the holder to acquire additional common shares of the Company, and the Company grants warrants as consideration for services associated with the placement of such common share issues.

The following table provides the details of changes in the number of outstanding common share purchase warrants:

2030	134,000
2031	150,000
	1,626,900

8. Financial instruments and risk management

Categories of financial assets and liabilities

Under Canadian GAAP, financial instruments are classified into one of the following five categories: held-for-trading, held to maturity investments, loans and receivables, available-for-sale financial assets and other financial liabilities. The carrying values of the Company's financial instruments, including those held for sale are classified into the following categories:

	September 30 2010 $	June 30 2010 $
Held for trading (1)	**731,999**	1,732,924
Available for sale (2)	**-**	-
Loans and receivables (3)	**255,600**	49,874
Other financial liabilities (4)	**136,066**	307,488

(1) Includes cash, committed cash and short-term investments.
(2) Includes marketable securities.
(3) Includes accounts receivable related to HST tax refunds.
(4) Includes accounts payable and bank overdraft.

Financial Instruments
The carrying amounts for the Company's financial instruments approximate their fair values because of the short-term nature of these items.

(i) Cash and cash equivalents and cash and cash equivalents held for future exploration are designated as financial assets held for trading and are recorded at market value. The interest on deposits is insignificant.
(ii) H.S.T. receivable is designated as loans and receivables and is recorded at cost.
(iii) Accounts payable is designated as other financial liabilities and is recorded at cost.

Risks arising from financial instruments and risk management
The Company's activities expose it to a variety of financial risks: market risk (including interest rate risk and price risk), credit risk and liquidity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company.

The Company uses various methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate and other price risks.

(a) Market risk

(i) Price risk

Commodity price risk
Commodity price risk is the risk of financial loss resulting from movements in the price of the Company's commodity inputs and outputs. The Company is exposed to commodity price risk arising from the fluctuation of the value of the metals it is exploring for. The Company does not manage commodity price risk through the use of derivative instruments.

Sensitivity
At September 30, 2010, a change in the value of gold and base metals would not change the recognized value of any of the Company's financial instruments.

(ii) Cash flow fair value interest rate risk

The Company does not have interest-bearing borrowings for which general rate fluctuations apply. The Company is exposed to interest rate risk to the extent of the balance of the bank accounts.

(b) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the group. Credit risk arises from cash and deposits with banks and financial institutions as well as credit exposures to outstanding receivables.

The Company has no concentration of credit risk. The carrying amount of financial assets recorded in the consolidated financial statements are adjusted for any impairment and represent the Company's maximum exposure to credit risk.

(c) Liquidity risk

Prudent liquidity risk management implies maintaining at all times sufficient cash, liquid investments and committed credit facilities to meet the Company's commitments as they arise. The Company manages liquidity risk by maintaining adequate cash reserves and by continuously monitoring forecast and actual cash flows. The Company is currently assessing all options to address its liquidity issues. It is not possible to determine with any certainty the success and adequacy of these initiatives.

9. Capital disclosures

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The capital of the Company consists of capital stock, warrants and contributed surplus.

The properties in which the Company currently has an interest are in the exploration stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and will raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the year ended June 30, 2010 and the period ended September 30, 2010. The Company is not subject to externally imposed capital requirements.

10. Contingencies and commitments

As at September 30, 2010;

a) the Company has no contingent obligations,

b) the Company has $40,894 on deposit as property reclamation bonds with various governmental agencies. These amounts are included with prepaid expenses,

c) the Company has the following minimum lease cost commitment for its head office space:

	Amount $
2010	5,772
2011	13,468
	30,784

11. Subsequent events

On November 1, 2010, 150,000 options and 75,000 options for consultants at exercise prices of $0.32 and $ 0.15 respectively, expired.

On November 5, 2010, the Company issued 1,000,000 stock options exercisable at $0.15 per share until November 5, 2015 to a director of the Company.
