CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED JUNE 30, 2005 AND 2004

AUDITORS' REPORT

**To the Shareholders of
Romios Gold Resources Inc.:**

We have audited the consolidated balance sheets of Romios Gold Resources Inc. as at June 30, 2005 and 2004 and the consolidated statements of operations, deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. These standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of the Company as at June 30, 2005 and 2004 and the results of its operations and cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

ROMIOS GOLD RESOURCES INC
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED JUNE 30, 2005 AND 2004

1. Nature of Operations:

Romios Gold Resources Inc ("Company") has interests in resource properties and is in the process of determining whether or not its resource properties contain reserves that are economically recoverable.

The recoverability of expenditures on its resource properties and related deferred exploration expenditures is dependent upon the existence of economically recoverable reserves, confirmation of the Company's ownership of the claims, the ability of the Company to obtain necessary financing to complete the exploration and the development of the properties, and upon future profitable production or proceeds from disposition thereof.

As at June 30, 2005 the Company has a working capital deficiency of \$3,404 (2004 - \$149,839). The ability of the Company to realize on its assets and discharge its liabilities in the normal course of operations is contingent on it being able to raise funds for working capital purposes in the future primarily through issuing capital stock.

2. Acquisition of Mclymont Mines Inc.:

On March 1, 2005 the Company acquired, through an exchange of shares, a 100% interest in Mclymont Mines Inc. ("MMI") a company whose only significant asset is an interest in the Newmont Lake Property in British Columbia. The Company issued a total of 2 million common shares at a price of \$0.15 per share and 500,000 warrants to acquire all of the issued and outstanding shares of MMI consisting of 3,000,001 common shares. Each warrant entitles the holder to acquire one additional common share at a price of \$0.20 per share in the first year and \$0.25 per share in the second year from closing. Of the total share consideration of 2.0 million shares, 1,000,000 were issued immediately. The balance are to be held in escrow and released at the rate of one share for each \$2.325 of work incurred on the Newmont Lake Property after an initial expenditure on the property of \$1,000,000. Therefore \$3,325,000 must be expended on the property for all of the escrowed shares to be released.

The warrants issued in the transaction have been valued at \$34,000. The fair value of the warrants issued in the transactions were estimated using the Black-Scholes option pricing model with the following weighted average assumptions used for grants as follows: dividend yield of 0%, expected volatility of 11%, risk-free interest rate of 4.5% and expected life of 9 months.

The acquisition has been recorded using the purchase method of accounting.

In management's opinion there is no reasonable certainty that the Company will be able to raise additional funds to spend on this property and therefore management is of the opinion that none of the contingent consideration should be recognized. Therefore the shares subject to the contingency will only be recognized when the actual funds (over and above the initial \$1.0 million dollar expenditure) are expended on the property or sufficient funds are raised for and specifically earmarked for the Newmont Lake Property. The purchase equation will be adjusted accordingly when the results of the contingency become clear.

The consideration was paid as follows: 1,000,000 shares at \$0.15 for a total of \$150,000; finders fees of 150,000 shares at \$0.15 per share for \$15,000 in total; warrants valued at \$34,000; and cash costs incurred in the acquisition in the amount of \$30,000; for a grand total of \$229,000.

The consolidated financial statements includes the results of operations of MMI from March 1, 2005 to June 30, 2005. The following represents the allocation of the consideration among the fair market value of the net assets acquired:

Working capital deficit	\$ (14,556)
Resource properties	<u>243,556</u>
Total consideration given	<u><u>\$ 229,000</u></u>

ROMIOS GOLD RESOURCES INC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED JUNE 30, 2005 AND 2004

3. Summary of significant accounting policies:

The consolidated financial statements of Romios Gold Resources Inc. [the "Company"] have been prepared by management in accordance with Canadian generally accepted accounting principles. The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the accounting policies summarized below:

a) Basis of presentation:

These consolidated financial statements, for the year ended June 30, 2005, include the accounts of the Company's wholly-owned subsidiary, Mclymont Mines Inc. (see Note 2) from the date of acquisition, March 1, 2005. All intercompany transactions and balances have been eliminated.

b) Mining claims and properties:

Mining claims and properties are stated at cost.

c) Deferred exploration expenditures:

Expenditures incurred in the acquisition and exploration of the Company's mining claims and properties have been deferred with the intention that the deferred expenditures and the cost of the mining claims and properties be amortized by charges against income from future mining operations. If the mining claims are allowed to lapse or the properties are abandoned, the cost of the mining claims and all associated exploration expenditures are written off.

d) Computer equipment:

Computer equipment is carried at cost and is depreciated at the rate of 30% per annum on a declining balance basis.

e) Long-lived assets:

The Company monitors the recoverability of long-lived assets, based on factors such as current market value, future asset utilization, business climate and future undiscounted cash flows expected to result from the use of the related assets. The Company's policy is to record an impairment loss in the period when it is determined that the carrying amount of the asset may not be recoverable. The impairment loss is calculated as the amount by which the carrying amount of the asset exceeds the undiscounted estimate of future cash flows from the asset.

f) Stock based compensation plan:

The Company has a stock-based compensation plan that is described in Note 7. Effective July 1, 2004 the Company adopted the new recommendations of the Canadian Institute of Chartered Accountant ("CICA") Handbook Section 3870, "Stock-based compensation and other stock-based payments". As required by the Handbook Section, effective for fiscal periods beginning after January 1, 2004, entities will no longer have the option of disclosing pro-forma information for employee, officers and directors options, that is, all awards must be recorded in the financial statements at fair value. This change is reflected in the current Company's June 30, 2005 consolidated financial statements.

g) Earnings per share:

The Company has adopted the recommendations of the CICA Handbook section 3500, Earning per Share ("EPS"). The revised section requires the presentation of both basic and diluted EPS on the face of the income statement regardless of the materiality of the difference between them. In addition, the new recommendations require the use of the treasury stock method to compute the dilutive effects of options, warrants and similar instruments as opposed to the previous method used which was the imputed earnings approach. The section also requires the disclosure of a reconciliation of the calculation of basic and diluted EPS be disclosed.

FOR THE YEARS ENDED JUNE 30, 2005 AND 2004

3. Summary of significant accounting policies (Continued):

h) Income taxes:

The Company has adopted the liability method of accounting for income taxes as outlined in the provisions of Section 3465 of the Handbook of the Canadian Institute of Chartered Accountants. Under this method, current income taxes are recognized for the estimated taxes payable for the current year. Future income tax assets and liabilities are recognized for temporary differences between the tax and accounting bases of assets and liabilities as well as for the benefit of losses available to be carried forward to future years for tax purposes that are likely to be realized.

i) Asset retirement obligations:

Effective July 1, 2004, the Company adopted CICA 3110, "Asset Retirement Obligations" which requires that the estimated fair value of liabilities for asset retirement obligations be recognized in the period in which they are incurred. A corresponding increase to the carrying amount of the related asset is recorded and depreciated over the life of the asset. The estimates used in the valuations are based primarily on legal and regulatory requirements. It is possible that the Company's estimates of its ultimate reclamation and closure liabilities could change as a result of changes in regulations, the extent of environmental remediation required, the means of reclamation or cost estimates. Changes in estimates are accounted for prospectively from the period the estimate is revised.

An obligation has not been recorded with respect to asset retirement obligations (i.e. environmental remediation) for the Company's exploration and development properties. This is based on the fact that the mining and processing activities that give rise to the legal obligation have not yet occurred and/or the environmental disturbance which has occurred is not yet significant.

j) Use of estimates:

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the period. Actual results may differ from those estimates.

k) Financial instruments:

The Company's financial instruments recognized in the balance sheet consists of cash and cash equivalents, and current liabilities. The fair value of these financial instruments approximate their carrying value due to the short maturity or current market rate associated with these instruments.

4. Computer equipment:

	<u>Cost</u>	<u>Accumulated Depreciation</u>	<u>2005 Net</u>	<u>2004 Net</u>
Computer equipment	\$ <u>5,464</u>	\$ <u>4,797</u>	\$ <u>667</u>	\$ <u>951</u>

5. Mining claims and properties:

- (i) The Company acquired properties from a corporation controlled by an individual who is also an officer, director and shareholder of the Company, as follows:

a) Akow Lake area, Province of Ontario

On October 2, 1995, the Company acquired unpatented mining claim blocks in the Akow Lake Area, Patricia Mining Division. Consideration paid for these claims was issuance of 1,350,000 common shares of the Company at the value of \$0.01 per share for a total price of \$13,500. During the 1997 fiscal year 130,000 of the issued common shares were returned to treasury for cancellation. As the assets acquired remained Company property, the donation of shares for cancellation resulted in capital stock being reduced by \$1,300 and a corresponding amount was added to contributed surplus.

5. Mining claims and properties (continued):

b) Lundmark-Akow Lake Area, Province of Ontario

On January 26, 1996, the Company acquired unpatented mining claim blocks in the Lundmark-Akow Lake Area, Patricia Mining Division. The purchase price was \$24,700, based on reimbursement of out-of-pocket costs, and was paid with the issuance of 98,800 common shares at \$0.25 per share.

On June 27, 1996, under a separate agreement, the Company acquired further mining claim blocks in the Lundmark-Akow Lake Area, Patricia Mining Division. The purchase price was \$20,000, based on reimbursement of out-of-pocket costs, and was paid with the issuance of 80,000 common shares at \$0.25 per share. During the 1997 fiscal year the 80,000 common shares issued to acquire this property were returned to treasury for cancellation. This resulted in a reduction of capital stock by \$20,000 and a corresponding amount was added to contributed surplus.

Currently the Company has 13 claims comprised of 170 units in the Akow Lake area.

During the current year the Company wrote down its interest in these claims to \$500,000 which is management's estimate of the recoverable amount of the claims.

c) Net smelter returns royalty agreement

The former owner retains a 3% net smelter returns royalty in respect of each of the properties noted above. The Company has the right to re-purchase up to 2% of the royalty in respect of the entire block of claims as a whole in consideration for payment of \$1,000,000 for each 1% royalty re-purchased.

- (ii) On July 14, 1998 the Company entered into an option to purchase agreement with Platoro West, LLC ("Platoro") for the acquisition of a 100% working interest in sixteen (16) unpatented mining lode claims in Pershing County, Nevada, USA. Consideration payable to Platoro in order to exercise the option includes; US\$82,500 in cash (US\$45,500 paid to date), payable in installments ranging from \$3,000 to \$25,000 and the issuance of 100,000 common shares of the Company (issued to date 100,000 common shares). Platoro retains a 2% Gross Proceeds Royalty ("GPR") on the claims with the Company having the right to purchase up to a 1% of the GPR from Platoro in consideration for the payment of US\$725,000. The Company also issued 10,000 common shares at \$0.40 per share as a finder's fee upon execution of the agreement.

During a prior year the Company acquired and staked further claims in Pershing County, Nevada, USA. The properties are subject to a 1% Gross Proceeds Royalty as well as Net Smelter Returns Royalties varying between 2.25% to 4.0%. In order to save working capital the Company also stretched out the cash payments required to acquire the Nevada claims so that the final payment will not be due until May 14, 2006. The Company also agreed to pay the optionor an additional \$US 2,000 for the right to stretch out the payments. The option to purchase the 1% Gross Proceeds Royalty has been increased to \$US 775,000 from \$US 725,000. All other terms of the original agreement remain the same

- (iii) In prior years the Company had acquired, principally through staking, a 100% interest in 506 unpatented mineral claims and a 50% interest in 282 unpatented mineral claims located in southwestern Quebec in the vicinity of the mining community of Chibougamau. During the current year the Company staked additional claims. The Company continues to hold and interest in 56 unit claims in the Province of Quebec and has written off the cost associated with the lapsed claims during the prior year.
- (iv) The Company acquired by staking a total of 391 claims units in an area of approximately 15,640 acres west of the Sudbury Basin in the townships of McKinnon and Mongowin near the town of Espanola, Ontario. The Company granted an individual a 10% interest in the property pursuant to agreement with him for his proprietary knowledge and technical data which led to the decision to acquire the property.

5. Mining claims and properties (continued):

- (v) The Company has entered into an agreement to acquire a 161 acre property located in the Hislop Township near Timmins, Ontario in consideration for issuance of 350,000 common shares priced at \$0.225 per share and granting vendor a 2% NSR. The Company will have the right to reacquire the NSR from the vendor by paying a sum of \$250,000 for each 1% NSR or by issuing a further 350,000 common shares of the Company for entire 2% NSR.
- (vi) The Company has entered into option agreement to acquire 100% interest in 72 unpatented mining claim units totaling 2,880 acres in the Baldwin and Shakespeare Townships, Sudbury District, Ontario. In order to exercise its option the Company must pay a total of \$72,000 by December 31, 2005 and expend a total of \$81,000 on the claims by December 31, 2005. The optionors will retain a 2% NSR which can be purchased by the Company for sum of \$750,000 for each 1% NSR.

During the current year the Company decided that these claims did not warrant further exploration and has written-off all exploration expenditures and mining costs associated with these claims.

- (vii) On July 8, 2004 the Company entered into an option agreement to acquire a 100% interest in the mineral rights in a parcel of land totaling 148 acres in the Baldwin Township, contiguous to its larger and aforementioned Baldwin/Shakespeare property in Note 4(vi). The Company's only binding commitment under the agreement is to make an initial \$5,000 payment (paid) and issue of 10,000 common shares (issued), all further payments are at the option of the Company.

During the current year the Company decided not to pursue further these claims and thus has written-off all exploration expenditures and mining costs associated with these claims.

- (viii) On March 1, 2005 the Company acquired 100% interest in MMI by issuing 2.0 million common shares and 500,000 warrants. Each warrant entitles the holder to acquire one additional common share at a price of \$0.20 per share in the first year and \$0.25 per share in the second year from closing. MMI currently has a option to earn a 50% interest in the Newmont Lake property in British Columbia which consist of 23 mining claims totaling 282 claim units in the Laird Mining Division of British Columbia. Of the 2.0 million common shares 1.0 million are held in escrowed and release on the basis of one share for each \$2.325 of work incurred on the Newmont Lake property following the completion of \$1 million in expenditures. As part of the acquisition agreement the Company has also issued 250,000 common shares to Gulf International Minerals Inc. ("GIM") at a price of \$0.15 per share in place of MMI issuing shares as part of the option agreement between MMI and GIM.
- (ix) The Company also acquired from a director and shareholder a 100% interest in a further 71 mining claims totaling 1,500 claim units in the Laird Mining Division of British Columbia by payment in cash of \$25,000.
- (x) On May 17, 2005 the Company entered into an option agreement with Roca Mines Inc ("Roca") to acquire an option to earn 50% interest in 8 mining claims comprising 160 claim units in the Laird Mining Division of British Columbia in consideration for payment of \$200,000 (\$25,000 paid to date) and issuance of 600,000 common shares (150,000 common shares have been issued to date at a price of \$0.15 per share). The balance of cash and shares are due in increments of \$50,000 and 150,000 shares respectively on or before December 1 of each year for the next three years, with the exception that \$75,000 cash is payable in the third year. The Company is also required to expend \$1 million in exploration work on the property and issue 200,000 common shares to the holder of the 2.5% NSR upon commencement of commercial production and pay an annual advance royalty of \$30,000 per annum on the earlier of one year from the date on which the Company earns its interest in the property and December 31, 2007. The Company also has the right to increase its interest to 75% by paying \$2 million to Roca either in cash or in shares of the Company.

6. Cash held for future exploration:

During the current year the Company completed flow-through private placements for 3,903,331 shares priced at \$0.15 per share for gross proceeds of \$585,500. These funds are committed to be expended on Canadian Exploration Expenditures ("CEE") and as such are not available for current working capital purposes. During the year the Company spent \$160,044 on CEE leaving a balance to be spent in the amount of \$425,456.
